Tran Quang Khai

FULLSTACK DEVELOPER (REACT / NODE.JS)

0389 346 149 dev.khaitran@gmail.com khai-tran-software-engineer.id.vn
github.com/TranQuangKhai288 linkedin.com/in/khai-tran-quang Thu Duc City, Ho Chi Minh City

> **Fullstack Developer** with ~2 years of experience building Web Apps with React, TypeScript, and REST APIs (Node.js/Express, .NET). Hands-on with SQL/NoSQL databases (PostgreSQL, MongoDB), Redis, Docker, and AI-assisted development workflows (Claude Code, MCP).

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, Tailwind CSS, shadcn/ui, Ant Design, Refine, React Native

Backend: Node.js/Express, Socket.IO, Hono, FastAPI, .NET, REST APIs, JWT

Databases & DevOps: PostgreSQL, MongoDB, Redis, Docker, Git/GitHub

State & Forms: TanStack Query, Zustand, Redux, Context API, React Hook Form + Zod

Testing: Vitest, Testing Library, Playwright (AI-assisted)

AI Tools: Claude Code, MCP, LLM Chatbot, RAG / Embeddings

PROFESSIONAL EXPERIENCE

Fullstack Developer

06/2025 – Now

Tripdata Vietnam · B2B TravelTech Platform

Travel Booking Portal

Multi-service booking platform (Flights, Hotels) for travel agencies.

React JS | TypeScript | Tailwind CSS | TanStack Query | Zustand | Vite | Vitest | RESTful API | Redis | Docker | .NET

- **Web App Features:** Built flight/hotel search interfaces and multi-criteria filters using React and TypeScript, handling complex passenger validation workflows.
- **REST API & Docker:** Built and extended REST APIs using .NET (endpoints, DTOs, validation, error handling); leveraged Redis for caching and session storage; deployed services via Docker.
- **Data Caching:** Integrated TanStack Query and Zustand to cache API responses and cancel obsolete requests, reducing redundant network requests.
- **Performance (Web Workers):** Offloaded heavy search, sort, and filter operations on large datasets to Web Workers, keeping the main thread free and the UI responsive.
- **UI Migration & PDFs:** Migrated legacy UI from Bootstrap to Tailwind CSS and built responsive HTML/CSS flight ticket PDF templates.
- **Testing & Quality:** Wrote unit tests using Vitest and Testing Library and collaborated closely with QC to cover passenger validation schemas and filter edge cases.
- **Team Workflow:** Worked with Gitflow and pull-request reviews in a 16-member team.

AI Chatbot & Internal AI Tooling

Pre-rollout flight-booking AI assistant, multi-tenant AI admin portal, and agentic dev workflows.

React JS | TypeScript | Gemini Flash | GPT-4o | MCP | Claude Code | .NET | REST API

- **AI Chatbot UI:** Co-developed an LLM-powered chatbot (React, TypeScript) to resolve customer inquiries using pre-configured knowledge data and automated API workflows.
- **AI Admin Dashboard:** Built an admin dashboard (React, TypeScript, REST APIs) to edit and store prompts, manage datasets, and configure AI workflows per tenant.
- **API Integration:** Connected the chatbot with internal .NET services to dynamically trigger search and booking REST APIs directly within the chat interface.
- **LLM Evaluation:** Evaluated 4 LLMs (Gemini Flash, GPT-4o, GPT-3.5, Grok) on real prompts to compare response quality ahead of tenant rollout.
- **AI Tool Adoption:** Championed AI-assisted development tools (Claude Code, Antigravity) across the 16-member team, boosting team-wide weekly production releases from 2–3 to 5–9 tickets.
- **MCP & Agent Skills:** Authored internal MCP setup and skill libraries for Claude Code to implement tickets adhering to architecture and clean-code standards.

PROFESSIONAL EXPERIENCE (CONTINUED)

Freelance Mobile Developer
01/2025 – 04/2025

Freelance Project · Sports Booking & Social App

React Native CLI | TypeScript | Zustand | RESTful API | SSE

- **Mobile UI & State:** Built responsive mobile UI for court booking, real-time chat, and player profiles, managing global state with Zustand for smooth screen transitions.
- **API & Real-time Notifications:** Integrated RESTful APIs and Server-Sent Events (SSE) to deliver instant booking confirmations and live activity notifications.

Software Developer
06/2024 – 12/2024

Tech JDI Vietnam · JDI Group (Singapore)

AI Knowledge Base – Internal AI Chatbot

LLM-powered chatbot for internal knowledge retrieval.

Node.js | FastAPI | MongoDB | REST API | Refine | TypeScript | SSE

- **Node.js Backend & Embeddings:** Built REST API services using Node.js and FastAPI to store text chunks and vector embeddings in MongoDB (NoSQL) for internal RAG retrieval endpoints.
- **SSE Streaming Chat UI:** Built conversational UI consuming SSE for real-time token streaming answers, markdown rendering, and auto-scrolling message streams.
- **API Resilience & UX:** Implemented loading, error-handling, and retry logic to gracefully manage rate limits, slow LLM responses, and network drops.

Wealth Advisor – HR Management Platform

Role-based, multi-level HR platform with permission delegation and task assignment.

Refine | TypeScript | Ant Design | REST API

- **Role-based Admin Dashboard:** Developed admin dashboard using Refine and Ant Design, translating permission matrices into an intuitive management interface.
- **Rendering Performance:** Optimized rendering logic for large datasets, maintaining a smooth user experience under high data volume.

PERSONAL PROJECTS

ZenFlow Spa – SaaS-ready Spa Management Platform
05/2026 – Now

Multi-tenant spa management Web App featuring high-fidelity interface, real-time booking, and operational dashboard.

↗ Live Demo

Next.js 15 | React 19 | TypeScript | Tailwind CSS v4 | shadcn/ui | Hono | Cloudflare Workers | Supabase | PostgreSQL | Pusher

- **Multi-tenant:** Single shared database (PostgreSQL) with strict tenant isolation partitioned by spa_id.
- **Edge REST API:** Built serverless APIs on Cloudflare Workers using Hono with zero cold starts.
- **Automated Cron Tasks:** Scheduled Cloudflare Cron Triggers every 15m to compute availability and send SMS.
- **Real-time & Security:** Handled live dashboard updates via Pusher, signed with Web Crypto HMAC-SHA256.
- **Modern UI:** Built responsive tenant booking pages and dashboard using Tailwind CSS v4 and shadcn/ui.

Cupid Echo – Dating & Matching Mobile Application
09/2024 – 11/2024

Personal project, built end-to-end (mobile app + REST API backend).

⬡ GitHub (App) ⬡ GitHub (Backend)

React Native | TypeScript | Node.js | Express | MongoDB | JWT | Socket.IO | WebRTC

- Built REST API backend with Node.js/Express and MongoDB (NoSQL), secured with JWT authentication.
- Implemented real-time features with Socket.IO: blind chat rooms and a scoring-based matching queue.
- Integrated WebRTC-based audio/video calling into the mobile app.

EDUCATION

B.Sc. Software Engineering
2021 – 2026

University of Information Technology — VNU-HCM
