Tran Quang Khai

FULLSTACK DEVELOPER (FRONTEND-FOCUSED)

0389 346 149 | dev.khaitran@gmail.com | khai-tran-software-engineer.id.vn
github.com/TranQuangKhai288 | linkedin.com/in/khai-tran-quang | Thu Duc City, Ho Chi Minh City

> **Fullstack Developer (Frontend-focused)** with **~2 years of experience** in **React, Next.js, and TypeScript**, implementing RESTful APIs and service integrations (Node.js/Express; working knowledge of C#/.NET). Experienced in **AI integration**: LLM chatbots, RAG pipelines with vector embeddings, multi-tenant prompt/workflow admin tools, and custom **MCP & agent skill setups**.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, Tailwind CSS, shadcn/ui, Ant Design, Refine, Bootstrap, React Native

State & Forms: TanStack Query, Zustand, Redux, Context API, React Hook Form + Zod

Testing: Vitest, Testing Library, Playwright (AI-assisted)

Backend (working knowledge): Node.js/Express, C#/.NET, FastAPI, REST APIs

Data & DevOps: MongoDB, PostgreSQL, Redis, Docker, Git/GitHub

AI Integration: LLM Chatbot, RAG / Embeddings, Prompt/AI Admin Tooling, MCP, Claude Code, Antigravity

PROFESSIONAL EXPERIENCE

Fullstack Developer (Frontend-focused)

06/2025 – Now

Tripdata Vietnam · B2B TravelTech Platform

Travel Booking Portal

Multi-service booking platform (Flights, Hotels) for travel agencies.

React JS | TypeScript | Tailwind CSS | TanStack Query | Zustand | Vite | Vitest | RESTful API | Redis | Docker | C# / .NET

- **Feature Development:** Built flight/hotel search interfaces with dynamic multi-criteria filters and a multi-step booking wizard with complex passenger validations.
- **Backend Integration:** Implemented and extended backend APIs (REST endpoints, DTOs, validation, error handling) and services in C#/.NET; used Redis for caching and session storage, and Docker for deployment.
- **Performance Optimization:** Integrated React Query and Zustand to cache API responses and abort obsolete requests, reducing redundant calls by ~30%.
- **UI Migration & PDFs:** Refactored legacy UI by migrating from Bootstrap to Tailwind CSS; built responsive HTML/CSS flight ticket PDF templates.
- **Performance (Web Workers):** Offloaded search, sort, and filter operations on very large flight lists to Web Workers, keeping the main thread free and the UI responsive.
- **Testing & Quality:** Wrote unit tests with Vitest and Testing Library and collaborated closely with the QC team to cover passenger validation schemas and search filter edge cases.

AI Chatbot & Internal AI Tooling

Pre-rollout flight-booking AI assistant, multi-tenant AI admin portal, and agentic dev workflows.

React JS | TypeScript | Gemini Flash | GPT-4o | MCP | Claude Code | Antigravity | C# / .NET

- **AI Inquiry Chatbot:** Co-developed an LLM-powered chatbot (React, TypeScript) designed to resolve customer flight-booking inquiries using pre-configured knowledge data and automated API workflows.
- **AI Admin Dashboard:** Built an AI Admin dashboard (React, TypeScript, REST APIs) to edit and store prompts, manage data, and configure AI workflows per tenant.
- **In-Chat Flight Booking:** Integrated the chatbot with internal C#/.NET services to dynamically trigger flight search and end-to-end booking APIs directly within the chat interface.
- **LLM Evaluation:** Evaluated 4 LLMs (Gemini Flash, GPT-4o, GPT-3.5, and Grok) across real-world test prompts to compare response quality ahead of tenant rollout.
- **AI Workflow Proposal:** Proposed AI-assisted development tools for the 16-member team; weekly production releases rose from 2–3 to 5–9 large-scope tickets.
- **Skill Library & MCP:** Authored an internal skill library and MCP setup for Claude Code & Antigravity so agents read tickets, understand requirements, and implement code following existing architecture, clean-code standards, and component structure.

PROFESSIONAL EXPERIENCE (CONTINUED)

Freelance Mobile Developer
01/2025 – 04/2025

Freelance Project · Sports Booking & Social App

React Native CLI | TypeScript | Zustand | RESTful API | SSE

- **Mobile UI & State:** Built responsive mobile UI for court booking, real-time chat, and player profiles, managing global state with Zustand for smooth screen transitions.
- **API & Real-time Notifications:** Integrated RESTful APIs and Server-Sent Events (SSE) to deliver instant booking confirmations and live activity notifications.

Software Developer
06/2024 – 12/2024

Tech JDI Vietnam · JDI Group (Singapore)

AI Knowledge Base – Internal AI Chatbot

LLM-powered chatbot for internal knowledge retrieval.

Refine | TypeScript | Ant Design | Node.js | FastAPI | MongoDB

- **Streaming Chat UI:** Built conversational UI consuming SSE for real-time token streaming answers, markdown rendering, and auto-scrolling message streams.
- **AI Response UX:** Implemented resilient loading, error, and retry states to gracefully handle slow LLM responses, rate limits, and transient network errors.
- **Backend & Embeddings:** Built Node.js and FastAPI services to store text chunks and vector embeddings in MongoDB for RAG retrieval endpoints.

Wealth Advisor – HR Management Platform

Role-based, multi-level HR platform with permission delegation and task assignment.

Refine | TypeScript | Ant Design | Bootstrap

- **Complex UI:** Built role-based admin dashboard with Refine & Ant Design, translating permission matrices into an intuitive interface.
- **Performance:** Optimized rendering logic for large datasets, maintaining a smooth user experience under high data volume.

PERSONAL PROJECTS

ZenFlow Spa – SaaS-ready Spa Management Platform
05/2026 – Now

Multi-tenant spa management and booking system featuring high-fidelity glassmorphism design and real-time operations dashboard.

↗ Live Demo

Next.js 15 | React 19 | TypeScript | Tailwind CSS v4 | shadcn/ui | Hono | Cloudflare Workers | Supabase | Pusher

- **Serverless Architecture:** Built backend on Cloudflare Workers using Hono, integrating Supabase via REST/HTTP client to eliminate cold starts.
- **Automated Reminders:** Engineered Cloudflare Workers Cron Triggers running every 15 minutes to compute availability and trigger automated SMS via SpeedSMS.
- **Real-time Sync & Web Crypto:** Handled real-time dashboard events via Pusher REST API, using Web Crypto API for native HMAC-SHA256 signatures.
- **Multi-tenant UI & Modern Styling:** Designed responsive tenant landing pages and an operational dashboard using Tailwind CSS v4, custom animations, and glassmorphism styling.

Cupid Echo – Dating & Matching Mobile Application
09/2024 – 11/2024

Dating and matching mobile app featuring a scoring-based matching queue, blind chat rooms, and real-time WebRTC audio/video calls.

⬡ GitHub (App) ⬡ GitHub (Backend)

EDUCATION

B.Sc. Software Engineering
2021 – 2026

University of Information Technology — VNU-HCM
