Tran Quang Khai

FRONTEND DEVELOPER (REACT, NEXT.JS)

0389 346 149 dev.khaitran@gmail.com khai-tran-software-engineer.id.vn github.com/TranQuangKhai288
linkedin.com/in/khai-tran-quang Thu Duc City, Ho Chi Minh City

Frontend Developer specializing in **React, TypeScript, and Next.js**, building resilient UIs for AI products, including streaming chat interfaces and async, error-prone flows. Experienced with Node.js and Express for server-side work, leveraging AI coding tools daily with custom skills and agent rules to accelerate development.

PROFESSIONAL EXPERIENCE

Frontend Developer

06/2025 – Now

Tripdata Vietnam · B2B TravelTech Platform

Travel Booking Portal

Multi-service booking platform (Flights, Hotels) for travel agencies.

React JS | TypeScript | Vite | Zustand | Vitest | Testing Library

- **Feature Development:** Developed flight/hotel search engines with dynamic multi-criteria filters and a multi-step booking wizard with complex passenger validations.
- **Performance Optimization:** Integrated React Query and Zustand to cache API responses and abort obsolete requests, reducing redundant calls by ~30%.
- **Refactoring & Migration:** Refactored legacy UI components and migrated fully from Bootstrap to Tailwind CSS, improving page load speed and maintainability.
- **Document Generation:** Designed pixel-perfect responsive HTML/CSS templates for flight ticket PDFs, ensuring layout consistency across ticketing agencies.
- **Testing & Quality:** Wrote unit and integration tests with Vitest and Testing Library for complex passenger validation schemas and search filtering edge cases.

Freelance Mobile Developer

01/2025 – 04/2025

Freelance Project · Sports Booking & Social App

- Built responsive mobile UI for court booking, real-time chat, and player profiles, collaborating with backend developer to integrate RESTful APIs.
- Managed state sync and optimistic updates across booking and chat screens using Zustand, integrating SSE for real-time notifications.

Software Developer (Intern & Contractor)

06/2024 – 12/2024

Tech JDI Vietnam · JDI Group (Singapore)

AI Knowledge Base – Internal AI Chatbot

LLM-powered chatbot for internal knowledge retrieval.

Refine | TypeScript | Ant Design | Node.js | FastAPI | MongoDB

- **Streaming Chat UI:** Built conversational UI consuming SSE for real-time token streaming answers, markdown rendering, and auto-scrolling message streams.
- **AI Response UX:** Implemented resilient loading, error, and retry states to gracefully handle slow LLM responses, rate limits, and transient network errors.
- **Backend & Embeddings:** Built Node.js and FastAPI services to store text chunks and vector embeddings in MongoDB for RAG retrieval endpoints.

Wealth Advisor – HR Management Platform

Role-based, multi-level HR platform with permission delegation and task assignment.

Refine | TypeScript | Ant Design

- **Complex UI:** Built role-based admin dashboard with Refine & Ant Design, translating permission matrices into an intuitive interface.
- **Performance:** Optimized rendering logic for large datasets, maintaining a smooth user experience under high data volume.

EDUCATION

B.Sc. Software Engineering

University of Information Technology — VNU-HCM

2021 – 2026

TECHNICAL SKILLS

FRONTEND

React JS | Next.js | React Native | TypeScript | JavaScript ES6 | Vite | Refine

UI / STYLING

Tailwind CSS | shadcn/ui | Ant Design | Bootstrap | CSS Modules

STATE / FORM MGMT

TanStack Query | React Hook Form + Zod | Zustand | Redux | Context API

TESTING

Vitest | Testing Library | Playwright (AI-assisted)

BACKEND

Node.js | Express.js | FastAPI | RESTful API

DATABASE

MongoDB | PostgreSQL | Redis

DEVOPS / TOOLS

Git / GitHub | Docker

AI / LLM

LLM Integration | Cursor | GitHub Copilot | AI agent skills/rules

PERSONAL PROJECTS

ZenFlow Spa – SaaS-ready Spa Management Platform

05/2026 – Now

Multi-tenant spa management and booking system featuring high-fidelity glassmorphism design and real-time operations dashboard.

↗ Live Demo (Develop version)

Next.js 15/16 | React 19 | TypeScript | Tailwind CSS v4 | shadcn/ui | Hono | Cloudflare Workers | Supabase | Pusher

Backend & Infrastructure

- **Serverless Architecture:** Built backend on Cloudflare Workers using Hono, integrating Supabase via REST/HTTP client to eliminate cold starts and scale efficiently.
- **Automated Reminders:** Engineered Cloudflare Workers Cron Triggers running every 15 minutes to compute availability and trigger automated SMS via SpeedSMS.

Frontend & Real-time

- **Real-time Sync & Web Crypto:** Handled real-time dashboard events via Pusher REST API, using Web Crypto API for native HMAC-SHA256 signature generation.
- **Multi-tenant UI & Modern Styling:** Designed responsive tenant landing pages and an operational dashboard using Tailwind CSS v4, custom animations, and glassmorphism styling.

Cupid Echo – Dating & Matching Mobile Application

09/2024 – 11/2024

Dating and matching mobile app featuring a scoring-based matching queue, blind chat rooms, and real-time WebRTC audio/video calls.

⬡ GitHub (App) ⬡ GitHub (Backend)

React Native | Expo | TypeScript | NativeWind | Node.js | Express | Socket.IO | MongoDB | Stream.io SDK

Backend & Real-time

- **Matching & Scoring Engine:** Implemented a queue-based matching system evaluating compatibility scores with adaptive fallback thresholds over time.
- **WebSockets & Signaling:** Utilized Socket.IO for real-time events and room management, mounting an Express PeerServer for WebRTC signaling handshakes.

Mobile & WebRTC

- **Real-time Voice & Video Calls:** Integrated Stream.io Video SDK on React Native, enabling secure, token-authenticated WebRTC calls with low latency.
- **Interactive UI & Animations:** Built fluid gestures and transitions using React Native Reanimated and NativeWind, delivering a premium and native feel.
